About Me

Hi, I'm Mishka. Since beginning my journey as a freelance developer nearly 2 years ago, I've done remote work for agencies, consulted for startups, and collaborated with talented people to create digital products for both business and consumer use. Take a look at my projects below, if you think I'd be a good contact me or visit my portfolio site for more information. ([Portfolio](#)).

My Experience

News (Front-End)

The app executes voice commands. Used AlanAi Rest API. The site shows a list of different types of news. Which we can control with both mouse and voice commands.

[Read Code](#)

COVID-19 (Front-End)

The app shows Covid 19 real-time statistics. It is possible to view different diagrams to better understand the data. We can also find data from different countries.

[Read Code](#)

Shop (Front-End)

The app is in the online shopping category. The commerc.js admin panel is used for management. The stripe payment system is installed. The app is a demo version.

[Read Code](#)

Chat (Full-Stack)

A real-time chat component. that can be embedded in a variety of websites. Has basic correspondence functionality. Sorts by standard protocol.

[Read Code](#)

Shop (Ejs + Express)

Online store server side rendering. Sign in/ Sign up, has a customer-friendly admin panel. The user manages the products. Also controls various operations (e.g. orders, checkout, payment and etc.)

[Read Code](#)

Shop (React + Node)

Has all the features that an online store needs. Customer-friendly admin panel. The user manages the products. Also controls various operations (e.g. orders, checkout, delivery, payment and etc.)

[Read Code](#)

Shop (Mobile)

The application is built on the theme of the online store. Sign in/ Sign up, has a customer-friendly admin panel. The user manages the products. Also controls various operations (e.g. orders, checkout and etc.)

[Read Code](#)

Cooking (Mobile)

List of different categories of food recipes. Beautiful and simple user interface. Sort by food categories. Automatic distribution of categories. Function to add to favorites by user

[Read Code](#)

Booking (Mobile)

Simplified application for searching people's vacation spots. Has a division into different categories. Review each item and display the reference price

[Read Code](#)

Great Places (Mobile)

It is possible to add various large places to the database in the application. Google Maps service integrated. It is possible to take a picture and upload it to the place
